

## SUMMER INTERNSHIP AT THE FIELD MUSEUM

### Interested in the Philippines?

The Field Museum is offering 3 paid internship opportunities working with the Philippine Heritage Collections in Chicago. These dynamic internships will work closely with the Digital Co-Curation Team both in The Field Museum and out in the Filipino American community of Chicago. Interns will be challenged to think differently about the creative potential of historical anthropological collections and the ways in which diasporic communities can contribute. All 3 listings are detailed below. Check out The Field Museum's [website](#) for more information.

#### Regenstein Pacific Collections Internship

"This intern will be expected to aid community-based research with the Museum's outstanding Philippine Heritage Collection. The intern will assist with collection inquiries, associated research, and local co-curation community events and programs. Successful applicants will have strong personal, organizational, and

time management skills, as well as a familiarity with qualitative social science research. Ideal candidates will have a strong interest in Southeast Asian studies and the Filipina/o diaspora." [APPLY NOW](#)

---

## Calling all Women in Science!

"The interns will be required to research artifacts in The Field Museum's Philippine Heritage Collections relating to hunting, fishing, and food preparation. With this object-based research serving as a point of reference and the help of the Digital Co-Curation Team, the interns will engage members of Chicago's Filipino American community in multiple interviews asking questions of how these persons relate to the objects observed and their experiences with the larger topic at hand... The final video of this project will combine the stories gathered from interviewees, the discussion held at The Field, and the experience of the interns themselves." [APPLY NOW](#)
